
INTERNATIONAL MICROBIOLOGY CONTENTS Volume 2 Number 3 • September 1999

Monographic issue on MICROBIAL PATHOGENESIS Vázquez-Boland JA, Rotger R (eds)

EDITORIAL

- [pdf ▶](#) Microbial pathogenesis 131
Vázquez-Boland JA, Suárez M, Rotger R

REVIEW ARTICLES

- [pdf ▶](#) Interactions between encapsulated *Neisseria meningitidis* and host cells 133
Nassif X
- [pdf ▶](#) Molecular aspects of *Bordetella pertussis* pathogenesis 137
Locht C
- [pdf ▶](#) Intracellular parasitism and molecular determinants of *Legionella* virulence 145
Belyi Y
- [pdf ▶](#) Molecular mechanisms of malaria sporozoite motility and invasion of host cells 155
Sultan AA
- [pdf ▶](#) The *Yersinia* high-pathogenicity island 161
Carniel E
- [pdf ▶](#) Functional organization of the gene cluster involved in the synthesis of the pneumococcal capsule 169
García E, Llull D, López R
- [pdf ▶](#) The virulence plasmids of *Salmonella* 177
Rotger R, Casadesús J
- [pdf ▶](#) Bacterial toxins modifying the actin cytoskeleton 185
Richard J-F, Petit L, Gibert M, Marvaud JC, Bouchaud C, Popoff MR

COMPLEMENTS
